

Construction Update for the Week of April 23

Old Town construction crews will continue the underground utility work at the intersection of Washington Street and Main Street through the beginning of the week. The detour currently in place between Washington Street and the Bypass will be lifted once the utility work is complete at the intersection.

Work will then proceed north on Main Street causing a change in traffic flow. Beginning mid-week, Main Street, north of Washington Street, will be converted to a one-way street to allow the road to remain open as construction progresses. The diagonal parking spaces along Main Street will be removed to accomplish this change and people are encouraged to utilize the Village's public parking lot at the corner of Harrison Street and Washington Street.

For detour maps and construction updates visit the project website at www.OLDTOWNALGONQUIN.ORG. You can contact the construction team at any time or attend the next **Coffee with the Contractor** on May 4 from 9:00 am -10:00 am at Historic Village Hall if you have any questions or concerns.
