

Construction Update

On Monday, March 5th at 7:00 am construction crews will begin work on the sanitary sewer at the intersection of Main Street and Washington Street. The intersection will be closed during this time and construction at this location is anticipated to take about a week.

Construction work on moving the electrical utility lines underground will continue and the Main Street detour will remain for the next few weeks.

Due to the current road detour on Main Street and the closure of the intersection of Main Street and Washington Street residents, patrons and businesses should use the Route 31 Bypass to access properties south of Washington Street during this phase of construction.

Detour maps and construction updates can be found on the project website at www.OLDTOWNALGONQUIN.ORG. You can contact the construction team or attend the next Coffee with the Contract on March 9th from 9:00 am -10:00 am at Historic Village Hall if you have any questions or concerns.

As a reminder, please use caution when driving through this area and watch for additional construction updates!
