

## Construction Update for the Week of May 21

On Monday, construction crews will begin installing the new storm sewer between Washington Street and Algonquin Road. The electrical contractor will also begin installing underground conduits or pipes near the intersection of Main Street and the Bypass.

Main Street from Washington Street north to Algonquin Road will continue to function as a **one-way only southbound** street through this phase of construction. Vehicles traveling northbound on Main Street are being detoured at Washington Street to Harrison Street.

Drivers are urged to use caution while traveling in this area to ensure the safety of workers and pedestrians.

You are invited to "Take a Look" at a video and images of construction progress on the [Old Town Algonquin](#) website. The "Take a Look" section features a time-lapse video that captured some of the sanitary sewer construction work that was completed last week on this section of the corridor.

For detour maps and construction updates visit the project website at [www.oldtownalgonquin.org](http://www.oldtownalgonquin.org). You can contact the construction team at any time or attend the next **Coffee with the Contractor** on June 1 from 9:00 am - 10:00 am at Historic Village Hall if you have any questions or concerns.
