

Construction Alert!

The removal of AT&T's utility infrastructure from the bridge over Crystal Creek will begin on **Monday, February 18**. In order for this work to begin, a **new Main Street detour** will be implemented. Beginning Monday, southbound traffic will access Main Street from the temporary alley access off of Harrison Street. Northbound Main Street traffic will be detoured at Washington Street to Harrison Street. The section of Main Street between Algonquin Road and the bridge over Crystal Creek will be closed to through traffic.

Demolition and reconstruction of the bridge will begin after the utility infrastructure is removed. This traffic detour pattern will remain in effect until the construction of the bridge is complete. Please share the detour map with your customers, employees and delivery drivers.
