

Construction Update for the Week of November 12

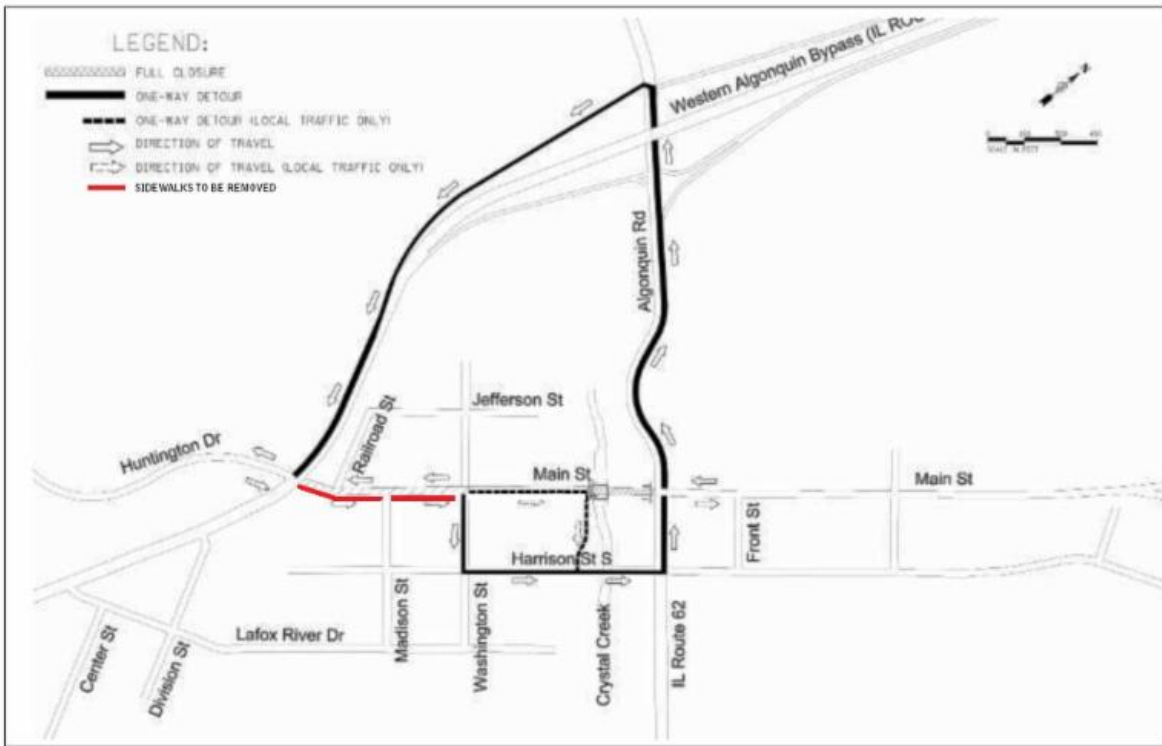

This will be an exciting week on Main Street. Crews will begin installing the new brick pavers on the west side of Main Street between Washington Street and Crystal Creek.

Crews will also bring nature and plant life back to Main Street as new trees are installed in the planters along the roadway.

Additional work will be happening between the Bypass and Washington Street with the installation of the curbs and gutters on the west side of the street.

If you have not visited in a while, we invite you to check out Main Street to see the progress first hand or visit the project website to [Take A Look](#) or use the [3-D Camera](#) to take a tour of Main Street.

As a reminder, northbound traffic continues one-way north of Washington Street to the temporary ramp next to Crystal Creek to access Harrison Street. Drivers will experience new pavement on the east side of Main Street north of Washington Street.

We want to remind everyone that the Coffee with the Contractor events have ended. We hope you found these meetings informative and helpful in addressing your concerns.
