

Construction Update for the Week of January 14

Construction crews have made great progress at Historic Village Hall. The concrete has been installed creating the base for new brick work that will be added once temperatures increase. The new outdoor fireplace has also taken shape. This feature will be completed in the coming weeks when the remaining top section is added.

The remaining elements of the projects at this site include:

- Decorative lighting which will be strung across the plaza
- Irrigation work
- Landscaping

Detour

Drivers traveling southbound can access Main Street from Algonquin Road. The bridge over Crystal Creek is open allowing one-way southbound traffic from Algonquin Road to Washington Street. Two-way traffic is allowed in the section of Main Street between Washington Street and the Bypass.

Parking is available at the village lot located at Harrison and Washington streets for workers, businesses and visitors.
