

Construction Update for the Week of March 25

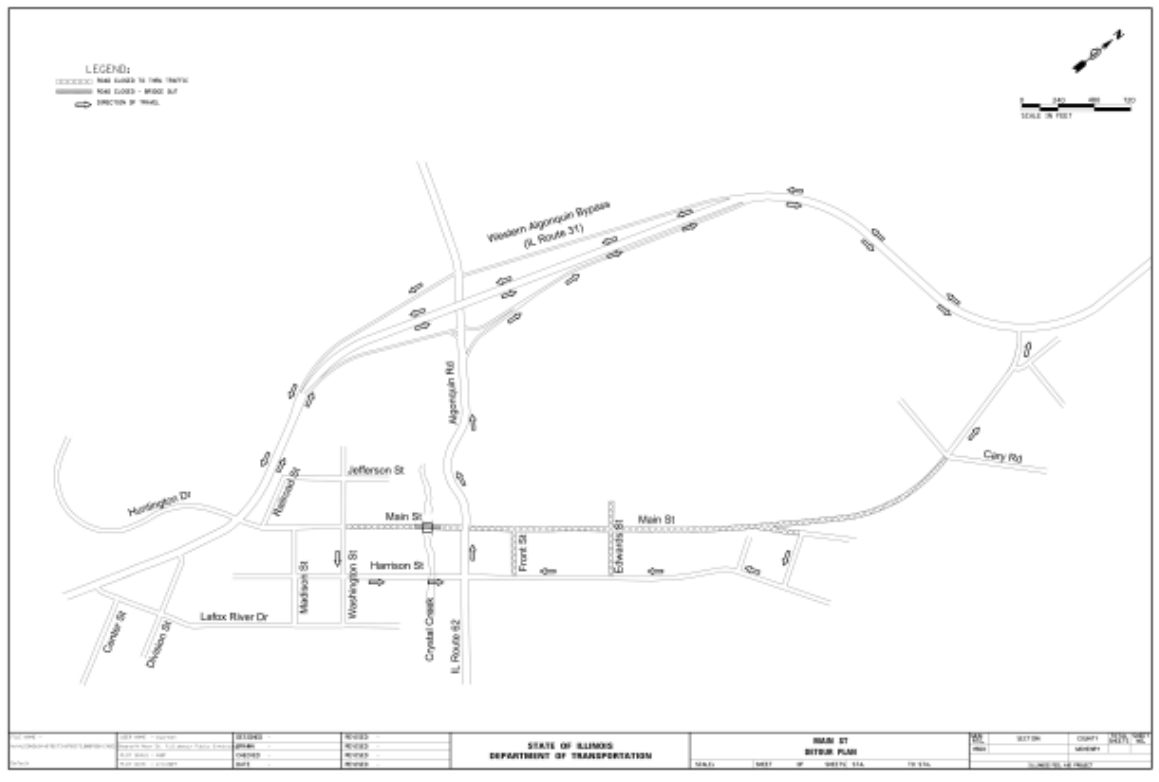

Crews have made significant progress in the demolition of the bridge over Crystal Creek. Due to the recent rain, water levels under the bridge are higher than normal and impacting construction. Demolition will continue as water levels allow.

Crews will also be preparing to add new life on Main Street with the installation of irrigation systems in the planters. This system will allow plant life to thrive in the planters along Main Street.

Crews will also continue the installation of the new sanitary sewer on the north section of Main Street throughout the week.

Please share the detour map, which can be found on the [project website](#), with your customers, employees and delivery drivers. As a reminder, the village parking lot at Harrison and Washington streets is available for workers, businesses and visitors.

For more information and the latest detour map, visit the [Old Town project website](#).
