

Construction Update for the Week of April 15

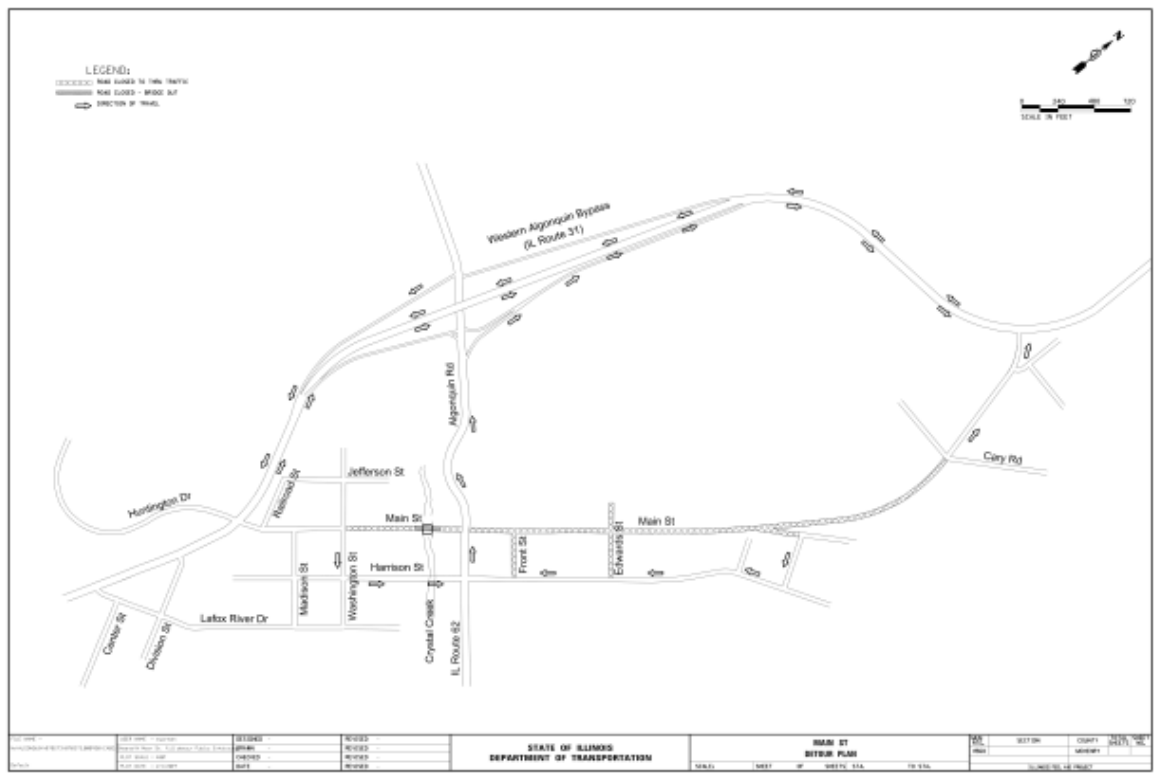

Crews are excited to have started the installation of brick pavers at Historic Village Hall Plaza this week. Brick installation has been on hold while crews waited for favorable weather to return. The plaza has already begun its transformation and this is the next step in creating a community gathering place.

Construction crews will also continue to build the temporary cofferdams structures at Crystal Creek. Cofferdams are watertight enclosures that permit construction work below the water of Crystal Creek.

Work also continues on the new water main and sanitary sewer installation on the north section of Main Street.

Please share the detour map, which can be found on the [project website](#), with your customers, employees and delivery drivers. As a reminder, the village parking lot at Harrison and Washington streets is available for workers, businesses and visitors.

For more information and the latest detour map, visit the [Old Town project website](#).
