

Construction Update for the Week of May 6

Friday's favorable weather allowed crews to finally begin drilling the 30 holes needed for the bridge foundation. These deep holes or shafts will be used to support the bridge structure. Work on the bridge will continue as weather permits.

On the north section of Main Street, the new water main and sanitary sewer installation will continue as the weather allows.

Please share the detour map, which can be found on the [project website](#), with your customers, employees and delivery drivers. As a reminder, the village parking lot at Harrison and Washington streets is available for workers, businesses and visitors.

For more information and the latest detour map, visit the [Old Town project website](#).
