

Construction Update for the Week of August 19

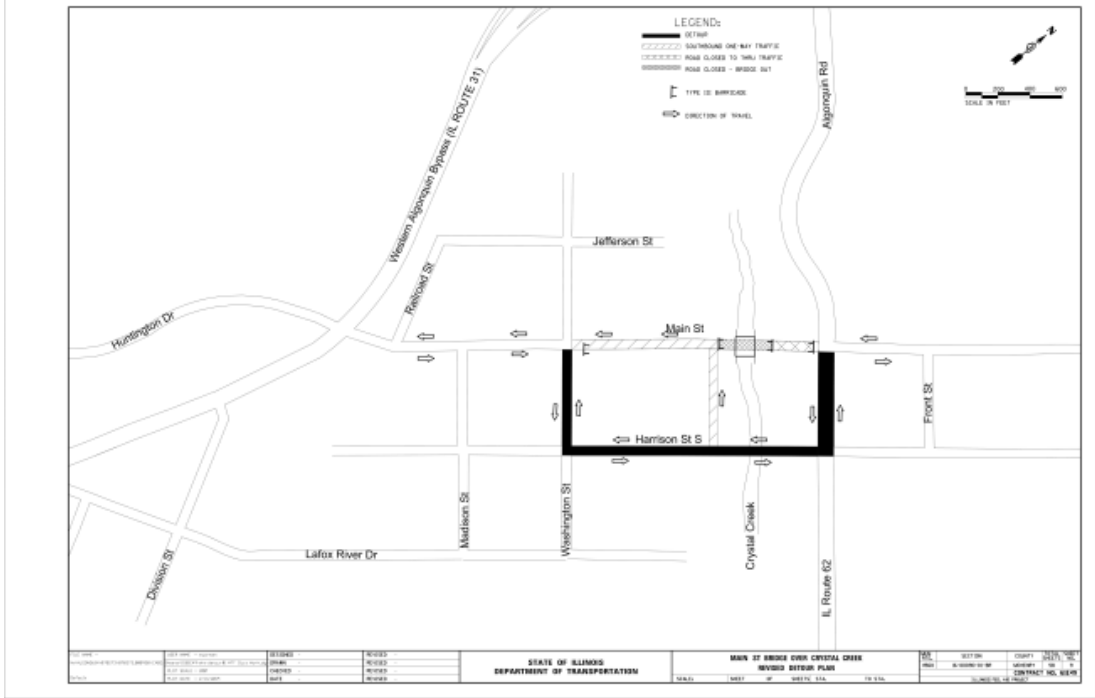

The construction team has made great progress on the Main Street bridge over Crystal Creek. Crews were able to pour the concrete that will create the street surface, curbs and sidewalks. This concrete will provide a smooth and safe surface for pedestrians and vehicles traveling on Main Street.

While the concrete cures or sets, focus will turn to installing the pavement that will create the roadway connection on the south side of the bridge. Crews will also continue installing underground utilities on the north side of the bridge.

As a reminder, the bridge will reopen to traffic this **fall** after the roadway work is complete.

The current detour impacting the section of Main Street south of Algonquin Road remains in place during bridge construction.

For more information and the latest detour map, visit the [Old Town project website](#).
