

Construction Update: April 18

This week, crews finished removing the old bridge over La Fox River Drive and they are now in the process of removing the old concrete bridge abutments. The east abutments has been removed and the one on the west side should be removed early next week. Crews also spent a considerable amount of time clearing trees and brush to accommodate the temporary access ramp that will allow users to access the trail at La Fox River Drive. A new ADA compliant ramp will be built south of the existing trail.

Next week, crews will begin installing supports for the new bridge. Also, the team will begin preparation at the proposed rest area by Rt. 31 and Main Street. This area will serve as a rest area with picnic tables, pergola and water fountains. All work is weather dependent.

Demolition of the bridge over La Fox River Drive

lighting that will be installed along the trail. Please note:

- They are small, decorative lamp posts about four feet high and less than two feet wide – not street lights.
- Only five bollard light posts will be installed.
- The bollard lights will accent the new features adjacent to the bicycle path near Rt 31.

See installation template for exact door position.

Construction Detour:

- The temporary ramp will route users to La Fox River Drive onto local streets where they can safely reconnect to the Prairie Trail through Towne Park.
