

Construction Update for the Week of October 21

The steel archway is in transit to Algonquin! Now that the final layer of concrete has been poured on the roadway, weather permitting, crews hope to erect the new steel archway over the bridge on Main Street next week.

This will require a short term temporary closure of the bridge. A construction alert will be sent with more details about the temporary closure once that information is available.

For more information and the latest detour map, visit the [Old Town project website](#).
