

## Construction Update for the Week of October 7

Last week, several dewatering wells were installed in the section of roadway north of Algonquin Road with the remaining wells expected to be installed today and fully operational.

This week, main line sewer work will begin starting at the intersection of Front Street and progressing north to Edwards Street.

The stage 1 detour will remain in place for the next several weeks until all work in this section is complete.

Vehicles traveling in this work zone are limited to only residents and businesses located in this area.

## Detour Alert

The Stage 1 detour plan is in effect. The detour is expected to remain in place until construction between Front and Edward streets is completed. Access to the residents and businesses within the work zone will be maintained.
