

## Construction Update for the Week of September 30

Last week, construction crews began preparing for the installation of the dewatering system by staging equipment and materials in the work zone area.

This week, the Stage 1 detour plan will remain in place as crews hope to start the installation of the dewatering system, weather and conditions permitting. This preliminary work is needed ahead of construction. Please continue to be mindful of flaggers as they direct traffic in the construction zone.

---

### Detour Alert

The Stage 1 detour plan is in effect. The detour is expected to remain in place until construction between Front and Edward streets is completed. Access to the residents and businesses within the work zone will be maintained.

## Stage 1 Detour Map
