

Construction Update: January 23

This week, crews completed all water main and service connections on La Fox River Drive and Center Street. This concludes installation of all underground utilities with the exception of one sanitary sewer connection at the intersection of La Fox River Drive and Center Street.

ComEd was also onsite and completed the electrical service for the lift station control building. A transformer box was installed north of the control building.

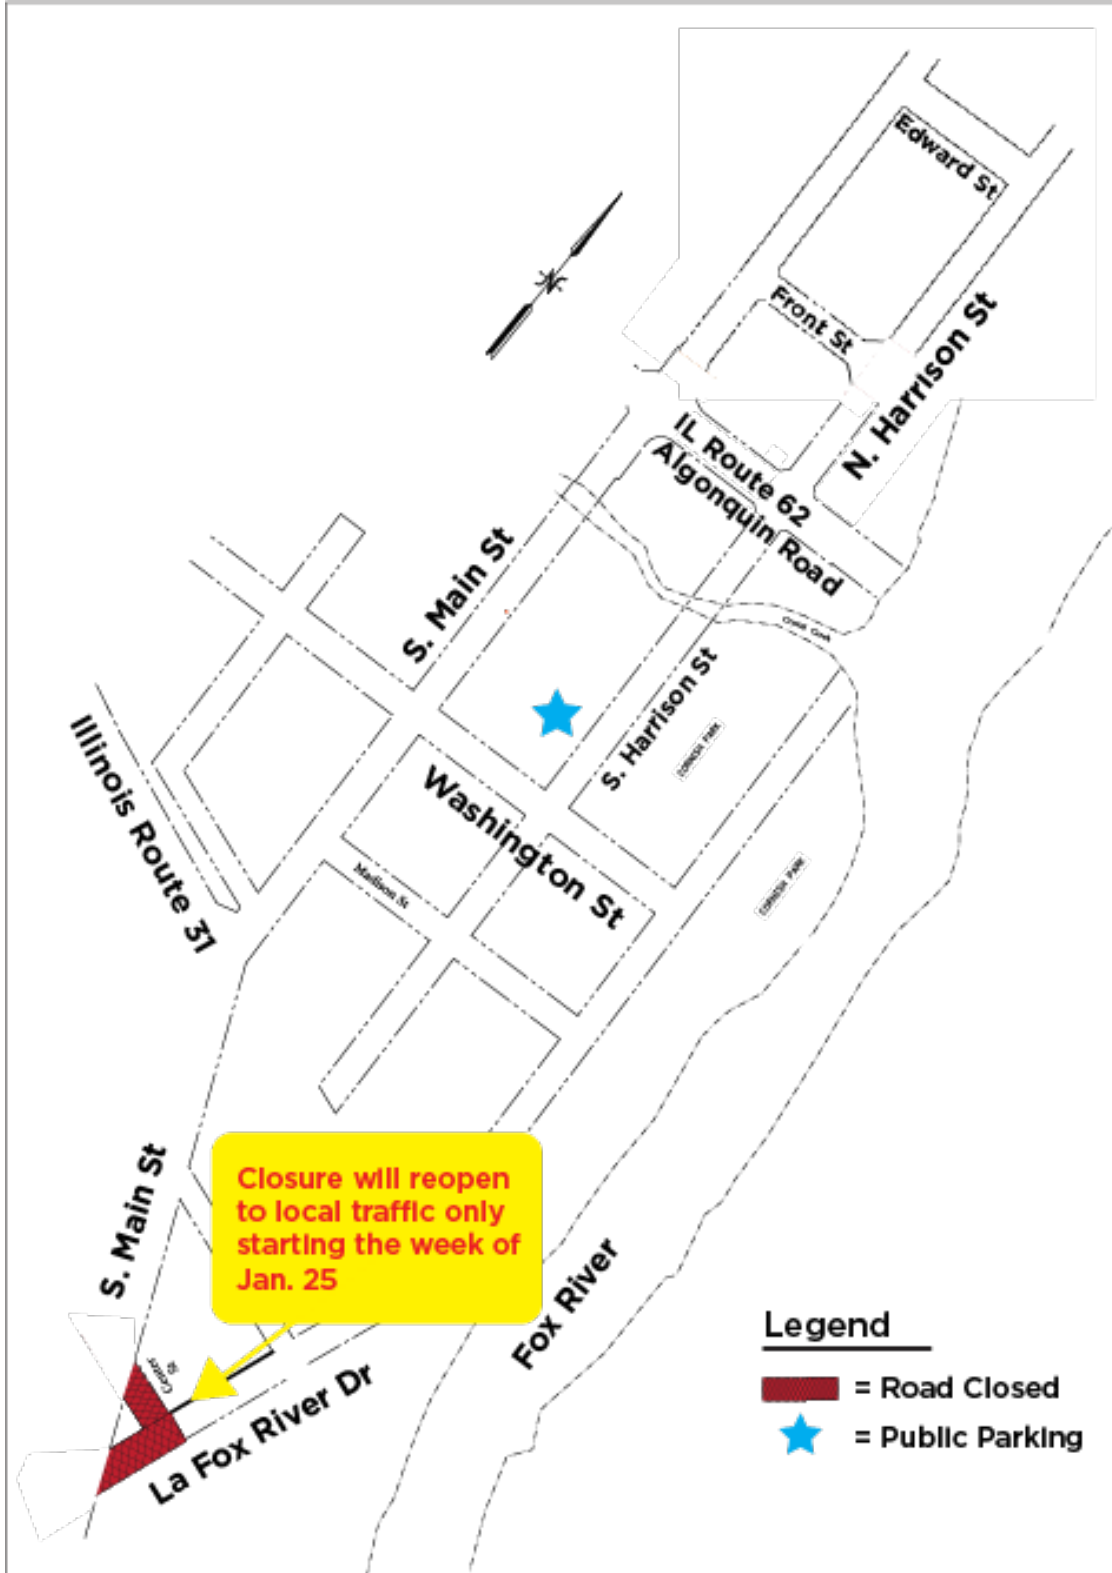

Early next week, crews will pour the concrete pad* of the odor control system for the lift station wet well. The control building for the lift station will be delivered and set on the building foundation in the middle of the week.
