

Construction Update: May 16

As previously noted, the work along La Fox River Drive has hit pause for the next few weeks while the construction team focuses on the work being done in coordination with the IDOT bridge project.

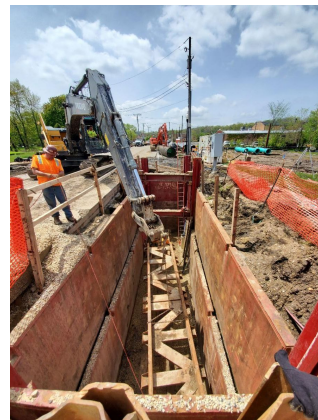

This week, crews verified existing utility locations and elevations in preparation for both the sanitary sewer and water main installations at the intersection of Algonquin Road and Harrison Street. They also completed the preparatory work for the installation of the sanitary sewer under Algonquin Road.

Please note, the contractor has elected to start working Saturdays, within the Villages approved working hours of 7 am - 8 pm. Starting today, May 16, crews will begin installing the water main at the intersection of Algonquin Road and South Harrison Street. This work is within the IDOT work zone on the south half of Algonquin Road. The contractor expects the water main installation to take a few weeks to complete.

Starting Monday, May 18, crews will begin boring a 48" steel casing under Algonquin Road, approximately 20' below the roadway. Crews anticipate needing a few weeks to install this casing pipe. Once the casing pipe work is complete, they will install the sanitary sewer within the casing pipe.

Existing utility locating for water main installation

Boring equipment installation

Boring pit shoring installation

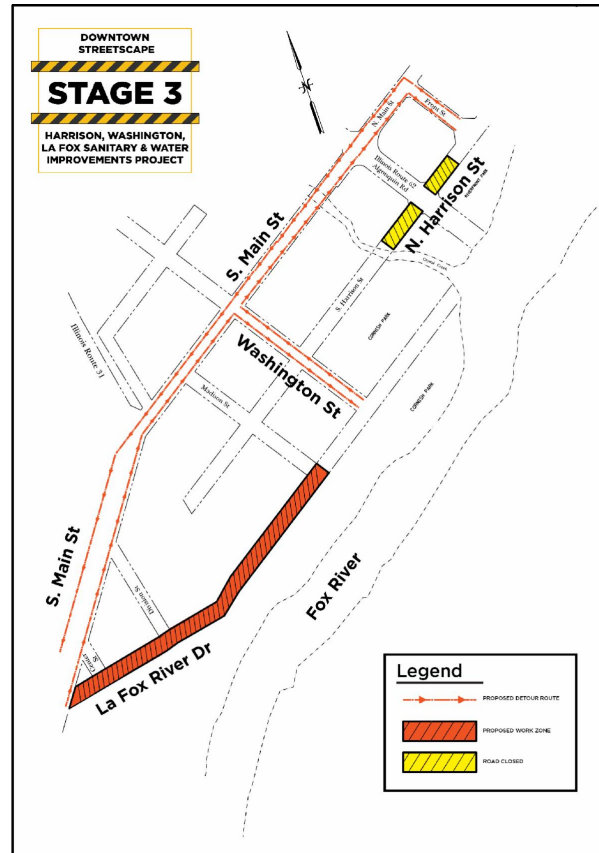

Boring preparatory work

Detour:

Due to the construction coordination at the bridge, access onto Algonquin Road from North and South Harrison streets will not be permitted. Please follow the detour route on Main Street to bypass this work zone.

Traffic will be routed along Route 31 to Main Street and then back to Washington Street and La Fox River Drive.

We ask that drivers, pedestrians and bicyclists use caution due to the level of construction equipment along La Fox River Drive.

This project is expected to take 10 months to complete. We appreciate everyone's patience and understanding as we invest in this important infrastructure project to improve the community.
