

Construction Update: May 23

Last week, crews finished installing the water main at the intersection of Algonquin Road and Harrison Street; this work was completed in coordination with the current IDOT Algonquin Road lane closures. Crews also completed the installation of the 48” steel casing under Algonquin Road at the intersection of Harrison Street.

Next week, crews will perform the necessary water main testing and finish the final connection so the new water main can be put into service. Crews will also install the sanitary sewer within the casing pipe and install manholes on both sides of the intersection.

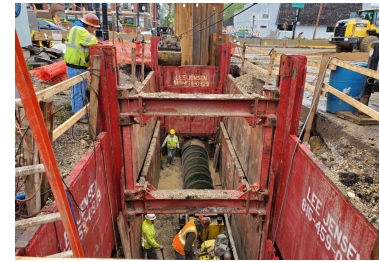

The contractor expects to complete the roadway patching work at the intersection of Algonquin Road and Harrison Street in the coming weeks. All detours remain in place.

Water main excavation

Water main valve
vault

Sanitary casing

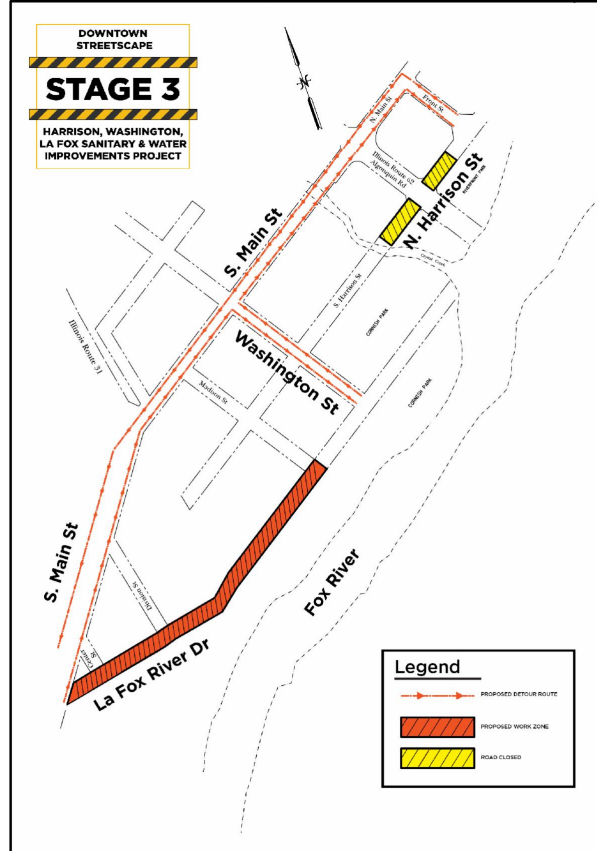

Detour:

Due to the construction coordination at the bridge, access onto Algonquin Road from North and South Harrison streets will not be permitted. Please follow the detour route on Main Street to bypass this work zone.

Traffic will be routed along Route 31 to Main Street and then back to Washington Street and La Fox River Drive.

We ask that drivers, pedestrians and

bicyclists use caution due to the level of construction equipment along La Fox River Drive.

This project is expected to take 10 months to complete. We appreciate everyone's patience and understanding as we invest in this important infrastructure project to improve the community.
