

## Construction Update: June 13

Sanitary sewer installation, road patching and concrete base course placement

Last week, crews completed the pavement patching associated with the work at the intersection of Algonquin Road and Harrison Street and the intersection will be reopened to traffic on Monday, June 15. Additionally, the team resumed construction of the sanitary sewer along La Fox River Drive, they installed the manhole at the intersection of Division Street and La Fox River Drive and have continued to progress north.

Start Monday, June 15, the contractor will begin installing a new water main through the intersection of Algonquin Road and Main Street, which will connect the new water mains which were installed on both South and North Main streets. **The intersection of Algonquin Road and Main Street will be closed June 15-24** to allow for the work to be completed (see details and map below). Crews will complete the second stage when IDOT shifts the traffic to the other side of Algonquin Road.

### What's Next?

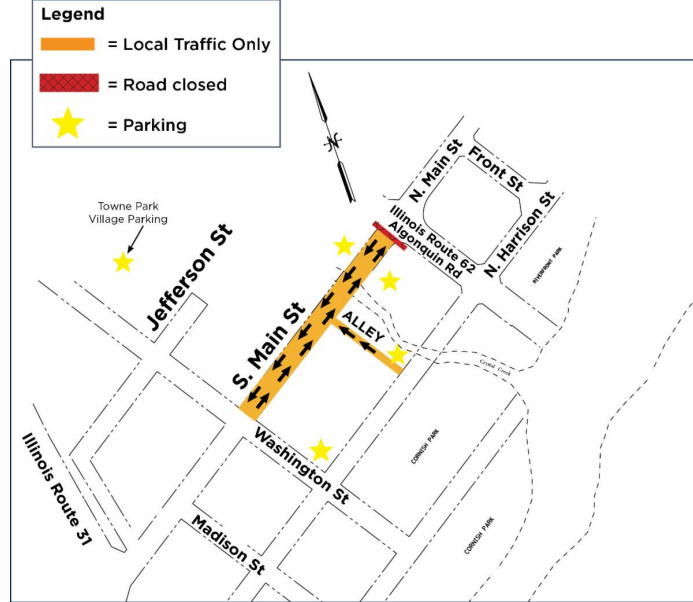

The contractor anticipates installing the sanitary sewer past the Prairie Path in the next few weeks. After reaching this milestone, crews will replace the disturbed areas along La Fox River Drive between Route 31 and the Prairie Path with a temporary asphalt patch until the final repaving work is completed. Installation of the sanitary sewer will continue to progress north while the patching work is being completed.

---

### Local Traffic Only:

The intersection of Algonquin Road and Main Street will be closed for construction June 15-

24. The Village will maintain two-way, local traffic on Main Street from Washington Street to Historic Village Hall/Rt. 62 (where the road closure will be located). The private alley next to The Black Bear Bistro will be available as a “one-way west” exit off Harrison Street to access Main Street. East bound traffic can use the parking lot behind Historic Village Hall to turn around.

This project is expected to take 10 months to complete. We appreciate everyone’s patience and understanding as we invest in this important infrastructure project to improve the community.
